

## Price Increases...

As you may be well aware, consistent worldwide demand for fuel, energy and raw materials is having an effect on all areas of manufacturing and production. Plastics, and associated materials are no exception, and it is with regret that I write to inform you of an overall price increase of **5%**.

Some of the increases that have been passed on to us by manufacturers have been in excess of this figure, but we have decided to absorb these few additional increases above the 5% for now.

This increase will be effective, as from **14th February 2008**, and will apply to all products and services that we offer.

In addition, our Standard Delivery Charge, that has remained unchanged since 2000, will be increased to £8.50.

All increases received from our third party carriers will be passed on accordingly. We will inform you of these as they are confirmed.

We hope that you will understand the necessity of these increases, and I would like to take the opportunity to thank you for your business, and offer my assurance of our best attention at all times...

Justin Watts, Managing Director
